## PERIO-SUPPORT FOR CATS AND DOGS

- **Perio-Support** is a dental supplement in a convenient delivery system designed to support your pet's periodontal health. **Perio-Support** is simply sprinkled on top of an animal's food. No more mess, stress or hassle.

### Dental health

- According to the American Veterinary Dental Society, 80-85 percent of all pets have periodontal disease. That number jumps to 100 percent in pets over 4 years of age. In fact, it is the number one health problem diagnosed in dogs and cats.
- Dental health is important to the overall health of your pet because it affects the health of the heart, lungs and kidneys, which is why it is important to provide your pet with proper daily dental care before there is a problem.

### Daily home dental care

- **Perio-Support** is formulated specifically for use between routine veterinary dental cleanings to help maintain clean teeth and fresh breath. This product is designed to help control plaque formation and support gum health.

### Dental health support

- **Perio-Support** is a tasty, aromatic powder in a convenient, easy-to-use shaker. Just shake the product on top of your pet's food. This targeted and quick delivery system helps keep your pet's mouth healthy as part of a daily periodontal care program.

### Facts about the ingredients in Perio-Support:

- **Natural zeolites** are unique minerals that help prevent plaque from forming and sticking to teeth.
- **Cranberry** is a source of antioxidants rich in bioflavonoids that support gum tissue health. They also help reduce undesirable bacteria that can lead to plaque build-up and tissue destruction.
- **Yucca schidigera extract** is an herb that inhibits enzymes that break down the structural integrity of gum tissue.
- **Taurine** works with **zinc** to support gum tissue health and strength. Strong gum tissue means that there is less dead tissue on which harmful bacteria can grow.
- **Zinc** penetrates plaque on the teeth and oxidizes it, resulting in less plaque formation. (Plaque formation is one of the causes of bad breath.)
- **Lactobacillus acidophilus and enterococcus faecium** are direct-fed microbials (friendly bacteria) that help restore bacterial balance in the mouth. They displace unhealthy plaque-causing bacteria to support healthy gums and fresh breath.
- **Vegetable fats** ensure product palatability, help ingredients adhere to the teeth and provide essential fatty acids that support gum health.

### Perio-Support is:

- Easy to use
  - Easy to remember
  - Easy to give due to its great taste and smell
  - A no stress, no mess, no hassle daily dental program
  - A guilt-free way to support periodontal health
- 
- **Directions for use:** Give 1 teaspoon per meal.
