### VETRI-DMG

- Supports immune system function and performance in dogs, cats and birds.
- DMG is an adaptogen that helps the body cope with various forms of stress caused by aging, poor oxygen availability, free radical damage and a weakened immune system.
- DMG supports performance by enhancing circulation, efficient oxygen utilization, and muscle recovery. DMG supports stamina through its ability to lower lactic acid build-up.
- DMG helps to support and strengthen the immune response when challenged by foreign antigens and microorganisms. Clinical studies show that it supports lymphocyte (T and B cell) and antibody production.
- DMG supports the production of intracellular glutathione and SAME.
- DMG supplies methyl groups for building and detoxifying many constituents in the body. It also acts as an antioxidant to protect the body from free radical damage.
- **Recommended for:**
  - ☐ Immune System Support
  - ☐ Liver Metabolism and Detoxification (methylanon)
  - ☐ Performance & Stamina (circulation, O<sub>2</sub> utilization)
  - ☐ Muscle Recovery (lactic acid)
- A hypo-allergenic chewable tablet or as an easy to administer liquid.
