LABORATORIES

VETRI-LEAN & VETRI-LEAN PLUS

- **Vetri-Lean** and **Vetri-Lean Plus** supports weight loss in overweight dogs, especially those in need of joint and connective tissue support, dogs eating high carbohydrate diets and for those fed table scraps.
- **Vetri-Lean** for dogs contains the clinically tested carb blocker **Phase 2 Pet®** to promote weight loss. We are one of the first companies to introduce a **Phase 2 Pet®** weight loss product for dogs. **Phase 2 Pet®** contains the first scientifically proven all natural white bean extract for neutralizing carbohydrates to induce weight loss. **Phase 2 Pet®** is shown to cut carbohydrates absorption up to 75%, so it safely and naturally reduces absorption of carbohydrate calories to support weight loss without the use of stimulants.
- A published study shows loss of weight and inches! In a veterinary conducted trial published July 2004 in the Journal of the American Holistic Veterinary Medical Association, 15 dogs showed an average weight loss of almost 5% of their body weight over an eight week period and an average abdominal girth reduction of 1.44 inches per dog due solely to use of **Phase 2 Pet®**. By blocking carbohydrates as a source of energy, the dogs were forced to burn body fat for energy. The weight loss seen in this study was attributed to loss of fat and not loss of muscle.
- **Vetri-Lean Plus** is an advanced weight loss support formula that is a synergistic combination of ingredients that have been clinically tested to support weight loss in overweight dogs. Green Tea Extract (containing EGCG) and Chromium Polynicotinate were added to **Vetri-Lean Plus** to promote even greater weight loss. **Vetri-Lean Plus** supports thermogenesis and lipolysis (greater fat burning) activity and helps normalize insulin and glucose metabolism, which helps control appetite.
- EGCG from green tea extract is a potent antioxidant that helps boost metabolism, maintain insulin levels within normal ranges (which promotes the burning of fat), and to control appetite.
- Chromemate® brand Chromium polynicotinate is a niacin-bound chromium which research shows is a safe and bioavailable form of chromium supplementation that supports appetite control, building of muscle, and the burning of fat. It also aids weight management due to its effects on carbohydrate and glucose metabolism.
- Support weight loss and weight management with **Vetri-Lean** and **Vetri-Lean Plus**. For superior results and a faster response time, support joint health in your overweight patients by using our Glyco-Flex® and Vetri-Lean products together!
- Great Chicken Liver Flavor - dogs love the taste!
- **Directions For Use:**
Up to 50 lbs: Give 1 tablet, 10 minutes before each meal.
51 - 100 lbs: Give 2 tablets, 10 minutes before each meal.
101 lbs and over: Give 3 tablets, 10 minutes before each meal.
- **Vetri-Lean**
0900529.060 (60 Tablets)
- **Vetri-Lean Plus**
0900531.060 (60 Tablets)

VETRI-LEAN
Active Ingredients Per Tablet:
Phaseolus Vulgaris
(Phase 2 Pet® brand) Extract 500 mg

Inactive Ingredients: allspice, brewers yeast, cellulose, chicken liver flavor, nutmeg, silicon dioxide, stearic acid.

VETRI-LEAN PLUS
Active Ingredients Per Tablet:
Phaseolus Vulgaris
(Phase 2 Pet® brand) Extract 500 mg
Epigallo-catechin gallate
(EGCG) (from 75 mg
of Decaffeinated
Green Tea Extract) 52.5 mg
Chromium (as Chromium Polynicotinate) 50 mcg

Inactive Ingredients: allspice, brewers yeast, cellulose, chicken liver flavor, nutmeg, silicon dioxide, stearic acid.
