

VETRI-SCIENCE®

LABORATORIES

VETRI-SHARK

- **Vetri-Shark** is made from 100% pure freeze/vacuum dried shark cartilage (without use of chemicals).
- **Vetri-Shark** supports connective tissue and joint health.
- The cartilage is sold as the by-product of the fishing industry. We do not purchase cartilage from suppliers that cull shark just for their cartilage.
- **Cautions:**
 - Use this product with caution in animals with a history of clotting disorders, diabetes, metabolic disorders associated with hyperglycemia, urinary tract stones and allergies to shellfish.
 - It should not be used for puppies, kittens, pregnant and lactating bitches or queens, or if an animal has had surgery in the past two weeks. All of these conditions need the production of new blood vessels and the inhibitor in **Vetri-Shark** would prevent this necessary function from happening.
 - For surgeries that involve cutting into vascular tissue or a body cavity (chest or abdomen), it's best to wait 2 to 4 weeks to allow for good vascular healing before using the product.

- **Directions For Use:**

Capsules

Initial (3 - 4 weeks): Give 1 capsule per 10 lbs of body weight, daily.

Maintenance: Give 1 capsule per 20 lbs of body weight. If less than 20 lbs, give 1 capsule every other day.

Powder

Initial (3 - 4 weeks): Give 1 scoop per 10 lbs of body weight, daily.

Maintenance: Give 1 scoop per 20 lbs of body weight, daily. If under 20 lbs, give 1/2 scoop daily.

- **Vetri-Shark**

0900443.060 (60 Capsules)

0900443.100 (100 Capsules)

0900443.200 (200 Gram Powder)
