

DERMA STRENGTH™

» Supports healthy skin structure and integrity, plus coat shine, health and luster

Derma Strength™ is formulated with Omegas 3, 6 and 9 to promote healthy skin and normal shedding. With added salmon oil and vitamin E, Derma Strength™ helps keep your dog's coat healthy, shiny and full.

Derma Strength™ chews are designed to support:

- » Coat sheen, luster and proper skin tone
- » Skin comfort for dogs
- » Normal shedding

About the formula:

Derma Strength™ contains ingredients specific to skin and coat health in dogs.

- » Flax seeds are rich in ALA (alpha-linolenic acid), an omega-3 fatty acid that helps support skin comfort. Flax seeds also contain lignans, which may have antioxidant properties, as well as vitamins B1, B2, C, E, and beta-carotene, and minerals like iron, zinc, potassium, magnesium, phosphorus, and calcium.
- » Safflower oil is an excellent source of

linoleic acid (omega-6 fatty acid), which supports skin tone and elasticity. Linoleic Acid is an essential fatty acid needed by the skin and supports the texture and luster of the coat. Incorporation of fatty acids into cell membranes supports the structural integrity of the skin and coat.

- » Vitamin E is essential for skin health. It is an antioxidant that neutralizes free radicals that could damage skin.
- » Salmon oil supplies omega 3 fatty acids - in particular EPA and DHA - the right omega-3 fatty acids for skin, coat, and the overall health of your dog.
