

GLYCOFLEX[®] » +PLUS

Glucosamine, Chondroitin, MSM, Antioxidants, plus Perna Mussel for Cats of All Sizes

GlycoFlex[®] Plus joint support for cats is specifically formulated to meet the needs of cats of all ages with joint health and mobility issues.

GlycoFlex[®] Plus for cats is a powerful formula for joint care that includes more active ingredients than other leading brands including chondroitin, glucosamine and Perna canaliculus. Available in a delicious, fish-flavored chew, **GlycoFlex[®] Plus** helps to cushion joints and keep your cats leaping and jumping.

About our ingredients:

- » GlycOmega™ brand *Perna canaliculus* is a green-lipped mussel from an exclusive New Zealand source. Unlike Perna extract-based products and mussel powders, which may lack important fatty acids and other bioactive components (e.g. defatted powders or extracts), the entire organism is utilized in GlycOmega™ Perna. All **GlycoFlex[®]** products are formulated with GlycOmega™ Perna.
- » DMG is naturally produced in your pet's body. This essential nutrient supports physical and mental energy levels, efficient oxygen utilization in tissues, and it acts as an antioxidant to maintain joint health.
- » Glucosamine has been shown to support the production of glycosaminoglycans (GAGs) within the cartilage matrix and

synovial fluid. As your cat ages, there is a decrease in the production of GAGs, which can result in joint stress, thinning of synovial fluid, and the breakdown of connective tissue. Glucosamine also supports bladder and urinary tract health by supporting the integrity of the mucosal lining.

- » MSM is a source of organic sulfur. It supports the structure of joints and connective tissue. Increased availability of MSM is linked to comfort and mobility, as well as the support of collagen production.
- » Manganese is an essential mineral for the formation of collagen, GAGs, and proteoglycans, all of which support required cartilage integrity. A lack of manganese can lead to inefficient production of GAGs within the joints.

Antioxidants:

- » Vitamin C
- » Vitamin E
- » Grape Seed Extract
- » Selenium
- » L-glutathione

The antioxidants in our formula help support immune system response, proper detoxification function, free radical neutralization, as well as provide support for a healthy inflammatory response.

ACTIVE INGREDIENTS PER 2 CHEWS:

Glucosamine HCl (Shrimp and Crab) **250 mg**
 Methylsulfonylmethane (MSM) **250 mg**
Perna canaliculus (GlycOmega™ brand Green-Lipped Mussel) **200 mg**
 Chondroitin Sulfate (Porcine) **100 mg**
 N,N-Dimethylglycine HCl (DMG) **50 mg**
 Vitamin E (dl-alpha Tocopheryl Acetate) . . **25 IU**
 Vitamin C (L-Ascorbyl-2-Polyphosphate) . **12 mg**
 Manganese (Mn Proteinate) **5mg**

Grape Seed (*Vitis vinifera*) Extract **2.5 mg**
 L-Glutathione **1 mg**
 Selenium (Na Selenite) **0.001 mg**

Inactive Ingredients: arabic gum, brewers yeast, calcium sulfate, canola oil, citric acid, citrus pectin, fish meal, glycerin, maltodextrin, mixed tocopherols, oat flour, propionic acid, rosemary extract, rye flour, silicon dioxide, sodium alginate, sorbic acid, soy lecithin, vegetable oil, water.

PRODUCT DETAILS:

GlycoFlex[®] Plus is a delicious fish-flavored chew, recommended for cats of all ages needing advanced joint support. This powerful combination of ingredients helps cushion joints, promote cartilage building and alleviate discomfort caused by normal daily activities.

090094E.030

DIRECTIONS FOR USE:

Initial: (4 - 6 Weeks)
 Give 2 chews per 10 lbs of body weight, daily.

Maintenance: (After initial period)
 Give 1 chew per 10 lbs of body weight, daily.

If giving more than 1 chew daily, divide between AM and PM.

GlycOmega™ is a trademark of Aroma New Zealand Ltd.
