

Composure™ Bite-Sized Chews

Composure™ Mini Bite-Sized Chews

A calming support formula recommended for pets exposed to increased environmental stressors.

When pets can't adapt to stress it can lead to anxiety, nervousness, hyperactivity, frayed nerves, abnormal urine marking, excessive scratching, trembling or shivering and destructive or aggressive behavior.

Recommended for:

- Changes to environment
- Boarding or kenneling
- Veterinary or grooming visits
- Holidays and parties
- Boredom or separation anxiety
- Moving or traveling
- Fireworks and thunderstorms

Composure™ helps alleviate stress-related behavior problems without affecting your animal's personality or energy level. It can be used daily or when extra help to relax is needed.

It contains a combination of factors not found in other calming formulas such as a calming complex from colostrum, L-theanine and thiamine (vitamin B₁), all of which address stress and calming.

About the formula:

- **C₃™** - Colostrum Calming Complex is isolated from colostrum proteins which have a calming effect on animals. These bioactive proteins have been found to support cognitive function and stress reduction. The Colostrum Calming

Complex works synergistically with the L-theanine in this formula to promote relaxation and cognition in dogs.

- **L-theanine** supports calming and relaxation and the reduction of irritability and low mood states. L-theanine has been extensively researched for its ability to reduce stress, anxiety and unwanted behavior. L-theanine is a naturally-occurring amino acid found in green tea that is a derivative of the neurotransmitter glutamic acid. It helps the body produce other calming amino acids such as dopamine, GABA and tryptophan and helps bring certain neurotransmitters into better balance. Studies on L-theanine showed that dogs reduced anxiety-related behavior without adverse effect or drowsiness; dogs were alert, playful and calmer than expected given their situations.
- **Thiamine** helps manage stress and reduces irritability. Thiamine (vitamin B₁) has been shown to affect the central nervous system to help calm and soothe anxious animals. A lack of thiamine can cause mental confusion, muscular weakness, muscle spasms, nervousness and weight and appetite loss during periods of stress.

Composure™ does not contain any herbal ingredients (Kava, valerian, St. John's Wort, etc.) or L-tryptophan. Its ingredients do not cause addiction, drowsiness or impaired motor skills.

Composure™ Bite-Sized Chews
0900780.060

Active Ingredients Per Approximately 1 Chew:

Thiamine (Vitamin B ₁)	134 mg
C ₃ ™ (Colostrum Calming Complex)	22 mg
L-Theanine	21 mg

Composure™ Mini Bite-Sized Chews
0900781.030
