Perio-Plus Feline Bites is a tasty, convenient dental formula designed to support dental health in cats, who will love the taste.

Perio-Plus Feline Bites has been designed to encourage compliance. These tiny bites have two delicious layers that represent a targeted and hassle-free delivery system to support cats’ dental health in between cleanings.

The outer layer of Perio-Plus Feline Bites promotes dental cleansing, plaque control and fresh breath. The inner core supports overall oral health, including gum tissue integrity and fresh breath.

Dental Health

According to the American Veterinary Dental Society, 80 to 85% of all pets (cats and dogs) have periodontal disease. In pets over four years of age, that number jumps to 100%. It is the number one health problem diagnosed in cats and dogs. Dental health is important to your pet’s overall health because it can affect the health of the heart, lungs and kidneys. It is important to provide pets with proper daily dental care to avoid any issues.

Daily Home Dental Care

Perio-Plus Feline Bites is formulated specifically for use between routine veterinary dental cleanings. This product is designed to help control plaque formation and support gum health, as well as to help maintain clean teeth and fresh breath.

About the Ingredients in Perio-Plus Feline Bites

Plaque Support

- **Pumice** (outer layer) is a natural abrasive that reduces plaque and bacteria that can lead to doggy breath.
- **Natural Zeolites** (inner layer) are unique minerals that help prevent plaque from forming and sticking to teeth.
- **Zinc** (inner layer) penetrates plaque on the teeth and oxidizes it, resulting in less plaque formation.
- **Enterococcus faecium** (Champex™ brand) (outer layer) is a natural abrasive that reduces plaque and bacteria that can lead to doggy breath.

Gum Tissue Support

- **Coenzyme Q₁₀ (inner layer)** is an essential catalyst for the creation of energy at the cellular level to support gum tissue function. Tissue levels of coenzyme Q₁₀ decrease as pets age. Deficiencies of Coenzyme Q₁₀ have been associated with improper functioning of the heart muscle and gum tissue.
- **Cranberry** (inner layer) is a source of antioxidants rich in bioflavonoids that support gum tissue health. They also help interfere with bacteria that can lead to plaque build-up and tissue destruction.
- **Taurine** (inner layer) works with zinc to support gum tissue health and strength. Strong gum tissue is important because bacteria grows on dead tissue.
- **Probiotics** (inner layer) (friendly bacteria) help support bacterial balance in the mouth. They help the body displace unhealthy plaque-causing bacteria to support healthy gums and fresh breath.
- **Yucca Shidigera Extract** (outer layer) is an herb that helps inhibit enzymes that break down the structural integrity of gum tissue.

Fresh Breath Support

- **Champignon Mushroom Extract** (Champex™ brand) (outer layer) has been extensively studies for its ability to suppress odor-causing chemicals in the intestines, stopping foul breath at the source.
- **Cinnamon** (outer layer) supports a healthy bacterial balance in the mouth.
- **Spirulina and Parsley** (outer layer) are great sources of the deodorizing and cleansing chlorophyll.

Perio-Plus Feline Bites is:

- Easy to use and highly palatable. Cats love them!
- Easy to remember
- Easy to give due to its great taste and smell
- A no stress, no mess, no hassle daily dental program
- A guilt-free way to support periodontal health

Directions for use:

Give 2 bites daily.

For best results use daily and give between meals.
